(As of April 9, 2018)

INDIVIDUAL INCOME TAXES	\$1.6 Trillion
PAYROLL TAXES	\$1.2 Trillion
CORPORATE INCOME TAXES	\$243 Billion
OTHER	\$278 Billion

Federální rozpočet USA

► Richest 1,409 taxpayers pay more income tax than bottom 70Mln

► Individual income tax to bring in about \$1.7 trillion in FY18

Individual income taxes are the federal government's single biggest revenue source. In fiscal year 2018, which ended Sept. 30, the individual income tax is expected to bring in roughly \$1.7 trillion, or about half of all federal revenues, according to the Congressional Budget Office.

Bloomberg looked into the 2016 individual returns data in detail for some additional insights illustrated in the charts below:

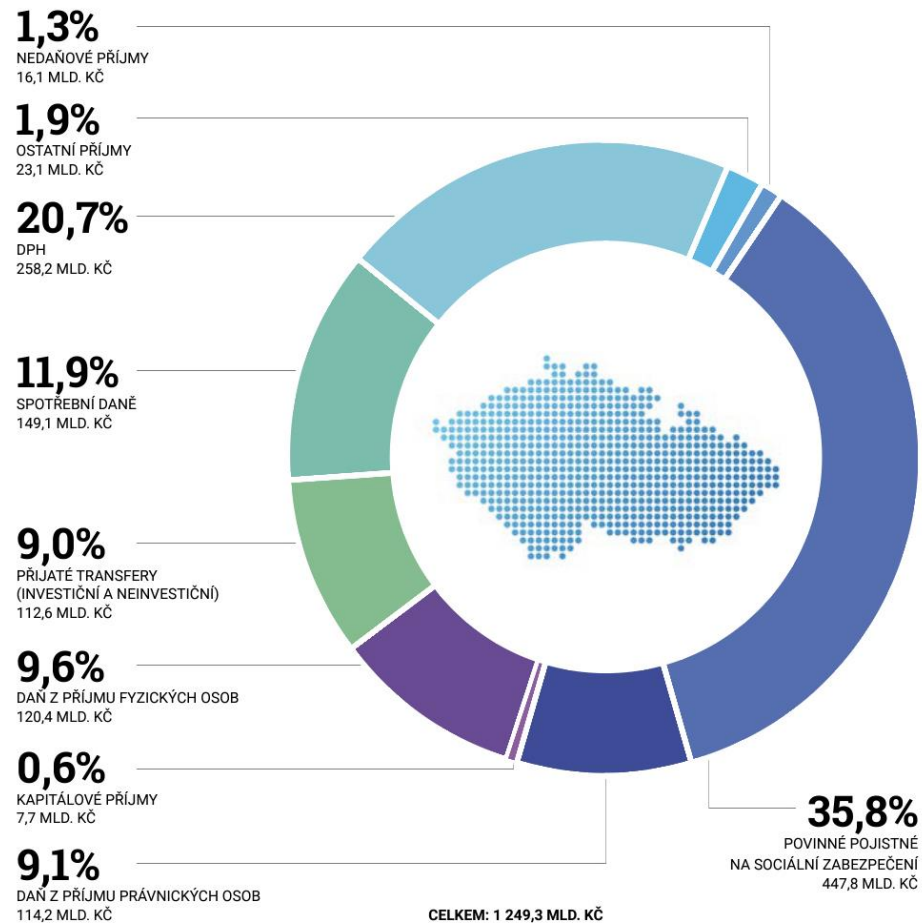

-
- The top 1 percent paid a greater share of individual income taxes (37.3 percent) than the bottom 90 percent combined (30.5 percent).
-
